- Includes a 'lock-down' facility for continuous sound output
- Extremely loud (130+dB at source)
- Made in the UK

THE WALK EASY 1-900 PERSONAL ALARM

The Walk Easy 1-900 Personal Alarm has proved to be arguably the world's most popular alarm because of its unique features since its first introduction in 1985.

Police and security advisors recommend the use of personal alarms to minimise the threat of assault, rape, mugging, animal attack or obscene telephone calls.

OPERATION

The alarm caters for all personal emergency and distress situations and operates by simply pressing the red cap lightly to produce an instantaneous short blast of the 138 dB ear-piercing siren audible up to 1/4 mile away, to attract attention in an injury or attack situation. To lock the alarm 'on' so that it operates continuously just press harder on the cap.

The Walk Easy 1-900 Alarm operates at any angle, even upside down. It has a lock-on facility allowing continuous operation if dropped to the ground. Most important is the fact that it will not leak liquid freezing propellant if inverted, thus there is no danger of a freeze burn to the user.

To ensure that your alarm is at the peak of efficiency please:-

Check the alarm regularly by activating for a short period. At the first sign of a weak sound, replace the propellant canister with a Refill.

WARNING

The effectiveness of the *Walk Easy* 1-900 Personal Alarm is in part due to its extremely loud and powerful siren, which produces 138 decibels of sound at source (125 decibels is the normal pain threshold of human hearing). As a result, prolonged exposure can cause permanent hearing damage.

DO NOT ACTIVATE THE ALARM UNNECESSARILY.

In particular take care to avoid endangering small children and pets. The manufacturer and its agents will not accept any responsibility for any loss, damage or personal injury sustained while in possession of this product whatever the cause or reason.

SPECIFICATION

Dimensions: 35mm X 110mm

Maximum Weight: 62 grams

Propellant: non-toxic, non-flammable and ozone friendly, conforming with Euro Directive 3093/94 for aerosol propellants.

Standards: The alarm complies with British Standard BS6800:86
