details including your own  
organisations name, address,  
telephone number etc.**

**\* 4 minutes continuous  
operation without  
'freezing' or 200 short  
blasts**

Our new aerosol Personal Alarm, the *Walk Easy 6-772L* has been specially developed for businesses and organisations to utilise as their own inexpensive personal alarm, and forms part of the world famous *Walk Easy* range of personal alarms. The alarm can be 'own labelled' with the name & details of the business or organisation, but for this facility will only be available for minimum orders of 25 alarms. Dimensions are approximately 3.9 inches (98mm) long and 1.5 inches (37mm) diameter. The liquified propellant in the aerosol is ozone friendly, non-toxic and non-flammable.

The alarms are manufactured to our own specification and to meet the requirements of British Standard BS6800, BS5750 Quality Standard, EC Regulation 3093/94EC, and EC Directive 89/336/EEC. In addition they are all 100% tested before leaving our factory in Cambridge.

We started producing our aerosol Personal Alarms in 1986 and have sold in excess of 7 million units since then. The *Walk Easy* "Own label" Alarm gives a blast duration of 4 minutes with the facility to 'lock down' for a continuous alarm shriek so that it continues to function if it falls to the ground during an attack. Alternatively it can be used to emit up to 200 short blasts. It produces an 'ear-splitting' sound blast in excess of 138dB at source, and a nominal level of 115dB at a distance of 1 metre. It can be operated in an inverted (upside down) position, and the raised cruciform across the entrance to the siren aperture in the black cap is shaped so that the alarm cannot rest with the aperture in a downward position if dropped on a firm surface, which of course would otherwise mute the sound.

The *Walk Easy* "Own Label" Personal Alarm 6-772L is available with a range of different cap colours.
